Hi-X15  
Professional Closed-Back  
Over-Ear Headphones

MAKING PASSION HEARD

# Heritage & Legacy

Our core team comprises former AKG (Vienna) personnel

- Patents held in multiple disciplines
- The team developed some of the world's best-selling condenser and dynamic microphones and globally renown headphones, that became industry standards.
- Extensive practical knowledge and ODM (Original Design Manufacturing) work in pro audio, consumer and automotive acoustics.

Over 350 years of experience

- Leaders in many engineering disciplines, including: acoustics; audio-electronic; automotive; DSP; embedded; firmware; mechanical; noise cancelling; software; test and measurement; telecom; and transducer.

AUSTRIAN AUDIO

# Hi-X Driver Technology

When it comes to great sound, we don't compromise. Hi-X15 headphones use the award-winning drivers of the Hi-X series. The development of Hi-X (High Excursion) technology is the result of decades of experience and state-of-the-art engineering. By reducing all moving mass, Hi-X15 headphones offer impressive dynamic characteristics and an extremely fast response.

The 44 mm Hi-X driver, with its vivid transients, reveals every sonic shade. Distortion-free reproduction down to the lowest frequencies allows for a linear and impressive natural reproduction of the low bass that's accurate, not exaggerated.

Thanks to their 25-ohm impedance, Hi-X15 headphones always deliver the greatest possible performance, whether you're listening through a high-end headphone amplifier, reference AD-converter, analogue mixer, keyboard, mobile player, or laptop. You'll always have the clear and precise sound you need to make important decisions about your work.

# Hi-X15

Professional Closed-Back On-Ear Headphones

## The workhorse...

The Hi-X15 closed-back headphones are the workhorse of the award-winning Austrian Audio Hi-X series, bringing the crystal-clear and precise listening experience of High Excursion technology to everyday use at an unbeatable price. They're perfect for studio, stage, rehearsal room, on tour, or practicing at home.

## ...for everyday use

Reach for Hi-X15 headphones when you need reliable sound and know things might get a little rough. Their sophisticated folding design, rare in this price range, means they're easy to store and carry, and their durable all-metal hinge and bow mean they're extremely robust. The closed construction and good insulation of the Hi-X15 headphones open up many areas of application. They show their strengths convincingly during studio recording sessions, as a monitor on stage, and as a reliable companion in the rehearsal room. And the Hi-X15 won't leave your side when you're enjoying music at home, writing the next hit in your project studio, mastering your new keyboard, or going on tour..

AUSTRIAN AUDIO

## Best-in-class comfort

Even in the longest sessions, Hi-X15 headphones won't let you down. We've designed them to keep you comfortable hour after hour. The headband and ear pads are made of soft memory foam and adapt perfectly to the shape of your head without pinching—and they're replaceable.

Every pair of Hi-X15 headphones ships with a detachable 1.4 m cable. The high-quality cable is assembled with a 3.5 mm stereo jack and is carefully matched to the technical specs of the headphones. A 3.5 mm-to-6.3 mm stereo jack is included for connection to stationary audio sources. Cables in a variety of lengths are optionally available and a bag for transportation is included in the package.

# Key Features

- Our proprietary High Excursion Technology, for low THD at lower frequencies and clear, precise sound
- Low impedance, so they sound great even when connected to low-power outputs like mobile devices
- Metal hinge for maximum durability
- Soft memory foam earpads to keep you comfortable during the longest sessions
- Foldable construction for easy storage, uncommon in this price range
- Detachable 1.4m cable included
  - Optional replacement different length cables available
- Carrying pouch included
- Unbeatable quality/price ratio – they're especially good value

# Technical Specifications

- Frequency range: 12 Hz - 24 kHz
- Sensitivity: 113 dBspl/V
- Impedance: 25 Ω
- Input Power: 150 mW
- Cable (detachable): 1.4 m
- Connector: 3.5mm (1/8")
- Adapter (included): 3.5 to 6.3 mm (1/8" to 1/4")
- Dimensions: 205 x 170 x 80 mm
- Weight (without cable): 255 g
