Over-Ear Headphones

MAKING PASSION HEARD

# Heritage & Legacy

Our core team comprises former AKG (Vienna) personnel

- Patents held in multiple disciplines
- The team developed some of the world's best-selling condenser and dynamic microphones and globally renown headphones, that became industry standards.
- Extensive practical knowledge and ODM (Original Design Manufacturing) work in pro audio, consumer and automotive acoustics.

Over 350 years of experience

- Leaders in many engineering disciplines, including: acoustics; audio-electronic; automotive; DSP; embedded; firmware; mechanical; noise cancelling; software; test and measurement; telecom; and transducer.

# Hi-X Driver Technology

When it comes to great sound, we don't compromise. Hi-X25BT headphones use the award-winning drivers of the Hi-X series. The development of Hi-X (High Excursion) technology is the result of decades of experience and state-of-the-art engineering. By reducing all moving mass, Hi-X25BT headphones offer impressive dynamic characteristics and an extremely fast response.

The 44 mm Hi-X driver, with its vivid transients, reveals every sonic shade. Distortion-free reproduction down to the lowest frequencies allows for a linear and impressive natural reproduction of the low bass that's accurate, not exaggerated.

Thanks to their 25-ohm impedance, Hi-X25BT headphones always deliver the greatest possible performance, whether you're listening through a high-end headphone amplifier, reference AD-converter, analogue mixer, keyboard, mobile player, or laptop. You'll always have the clear and precise sound you need to make important decisions about your work.

# Hi-X25BT

Professional Wireless Bluetooth® Over-Ear Headphones

## The Hybrid

Our Hi-X25BT closed-back Bluetooth headphones are a pro-level hybrid. You decide how you want to connect—via analogue or digital, wired or wirelessly. Enjoy the precision and clarity of award-winning High Excursion technology wherever you are. Hybrid convenience at the professional level – designed and engineered Austria

## Wireless, Digital Audio, Analogue Audio

Hi-X25BT headphones set the standard in connectivity. They offer a classic analogue connection via jack, a digital connection via USB-C, and absolute freedom wirelessly via Bluetooth. To keep you in the flow, they can be charged with a USB-C connection while playing music via Bluetooth. And thanks to the built-in high-efficiency battery, you can enjoy up to 30 hours of play wirelessly via Bluetooth.

The touch-sensitive controls are smartly integrated into the design and allow you to start, stop, move forward and back, change the volume, and answer a call. When you're connected to the Hi-X25BT via your smartphone and you make a call, the built-in microphone ensures crystal-clear voice transmission.

AUSTRIAN AUDIO

## Professional sound. No matter where or how.

Imagine recording a song in a professional studio, listening to your favourite music on the way home in the underground, calling your band mates while you're at it, and then finishing your song mix at home without ever changing headphones – brilliant. No matter where you are or how you like to work, your Hi-X25BT headphones will be there for you.

The sophisticated folding design of the Hi-X25BT headphones means they're easy to store and carry, and their durable all-metal hinge and bow mean they're extremely robust. They are designed to fit comfortably even after many hours of use. The headband and ear pads are made of soft memory foam and adapt perfectly to the shape of your head without pinching – and they're replaceable.

# Key Features

- Hybrid Connectivity:
  - Wireless Bluetooth® 5.0
  - Digital Audio via USB-C®
  - Analogue Audio via Jack Cable
- Our proprietary High Excursion Technology, for low THD at lower frequencies and clear, precise sound
- Metal hinge for maximum durability
- Replaceable soft memory foam earpads to keep you comfortable during the longest sessions
- Foldable construction for easy storage, uncommon in this price range
- Detachable 1.4m jack cable, 1.2m USB-C® cable and a USB-C® to USB-A adapter included
- Comes with carrying pouch

# Technical Specifications

- Frequency range: 12 Hz – 24 kHz
- Sensitivity: 113 dBsl/V
- Impedance: 25  $\Omega$
- Input Power: 150 mW
- Play time: 30 h
- Bluetooth® Version: 5.0
- Controls: Touch Control
- Jack cable: 1.4 m, 3.5 mm (1/8")
- USB Cable: 1.2 m USB-C®
- Connector: 3.5 mm (1/8")
- Adapters included: USB-C® to USB-A, 3.5 to 6.3 mm (1/8" to 1/4")
- Battery Type: Built-in Lithium Polymer
- Dimensions: 205 x 170 x 80 mm
- Weight (without cable): 270 g
