

Technical Data Sheet

BBC SOUND EFFECTS LIBRARY

This contents brochure effectively replaces the BBC brochure (02-081) which has been discontinued.

The BBC effects library has long been regarded as the standard library, and we are pleased to be able to offer the commercially released section on compact disc.

Everything from cars to aeroplanes, ships to trains. Sounds domestic, urban, rural and international. Over 90% of the effects are recorded direct to digital stereo – many of them using binaural techniques. The rest have been transferred from analogue to

digital. Each compact disc is accompanied by a booklet with a comprehensive index for the instant identification of effects. Note that disc 21 has been withdrawn from sale by the BBC.

The BBC Conditions of Sale allow virtually unlimited use of the discs in commercial, audio, video and film productions in perpetuity, and the subsequent broadcast, sale, hire and public exhibition of productions incorporating these effects without further charge.

Discs are available in sets, and subject to availability from the BBC (not guaranteed at all times), also available singly.

81-076 BBC SOUND EFFECTS LIBRARY Set of discs 1-20, 22-60
