INTRODUCING THE 4071 AND 4072 ADAPTORS WITH PHANTOM POWER BLOCKER

Our new 4071PB and 4072PB have built-in phantom power blocking capabilities that ensure your 4038 Microphone is protected from unwanted power interference that could cause ribbon damage and reduce audio quality.

4072PB

Using an adapter with a phantom power blocker allows you to safely connect your 4038 Microphone to equipment that may automatically supply phantom power, providing greater flexibility in your audio setup.

The 4071PB offers microphone to stand connection with a phantom power blocker

The 4072PB offers the same connection whilst having anti-vibration qualities and a phantom power blocker

4071PB
