

Technical Data Sheet

E380 PARALLEL BOX

42-1380 EMO E380 SPEAKON PARALLEL BOX

3x Neutrik SpeakON NL4 connectors, both channels wired in parallel. Ideal for 70 V / 100 V line systems, particularly for temporary rigs, as individual speakers can be tee'd off the main line. Can also be used for low impedance speakers, but care should be taken to ensure the amplifier's impedance and power limits are not exceeded.

25 A R.M.S. continuous, 150 V R.M.S. **WARNING: NOT to be used with AC mains power! Do not make or break connections under load!**
