QFLEX ISOLATOR

Isolation Module for
QFLEX Column Loudspeakers

- Isolation module for QFLEX column loudspeakers
- Allows large “star” topology QFLEX VNET networks
- Provides resilience to background noise over the network
- Eliminates issues with floating mains ground potentials between nodes
- Enables network connection testing before final system installation
- Screw terminal wiring for ease of installation
- 10-Year Warranty Program*
- Designed and engineered in the U.K.

The QFLEX ISOLATOR has been designed to resolve issues that often arise when large VNET systems are put into operation. It is specifically advised in situations where: the possibility that mains earth potentials exceeding +/-15V may exist between network nodes; electrical noise and interference may be present on the network cables, or wiring faults may exist on the network cable; the

installer wishes to create networks that have a large “star” topology; or the network utilises screw terminal terminations.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Tribe factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous Warranty program.
