

Power supply holder for RPS A100

Features

- Compact design
- Accommodates 1 power supply
- Innovative locking system to secure power supply
- Easy installation
- Compatible with RPS A100 power supplies

Description

Managing external power supplies can be challenging when striving for a clean, organized installation. The RXT A100 power-supply holder, designed for the RPS A100, can be mounted on the rear of the yellobrik RFR 1200 rack frame or directly onto a 19" bay. It streamlines cable management by securely fixing the external supply for a neat, professional setup.

The RXT A100 secures a single RPS A100 power supply. Up to two holders can be mounted on the RFR 1200 to accommodate both main and redundant power supplies.

An innovative locking mechanism keeps the power supply firmly in place, preventing movement during transport or when installing additional equipment.

Technical Specifications

Size	142mm x 65mm x 42mm (6.6in x 2.6in x 1.65in) excluding bracket
Weight	280g (9,87oz)
Model #	RXT A100 (EAN# 4250479829794)
Includes	1x power supply holder, 1x mounting bracket, 4 screws

Application Example

RXT A100 with RPS A100 installed, without latch closed. (RPS A100 not included)
