VT DUPLEX Lightweight Headworn Microphone

Double-sided. High comfort.

The VT DUPLEX is a headworn microphone with two ear hooks based on the successful VT901 MKII. It has been developed on customer's feedback asking for a version of the earhanger microphone featuring two ear hooks. This adds stability and ensures highest wearing comfort no matter if the microphone is worn on the left or right side.

The VT DUPLEX is available in two sizes, making it a perfect fit for both adults and children. The flexible gooseneck and the exchangeable cable guarantee maximum versatility. The headworn microphone VT DUPLEX is delivered with the innovative, nearly invisible windscreen Wsi.
